

Formula Regional Americas Championship

F4 United States Championship

Ligier Junior Formula Championship

New Jersey Motorsports Park

31 July – 3 August 2025

From	The Stewards	Document	Stewards Memo No. 1
To	All Team Managers	Date	1 August 2025
	All Teams	Time	7:45

The Stewards are aware that the F4 and JFC teams routinely scrub one or two sets of new dry weather tires during the optional test sessions for use in the official practice session(s). The Stewards also understand that, due to the cancellation of yesterday's final test session, those teams may not have had an opportunity to scrub a set of dry tires. As a result, the Race Director has proposed, and the Stewards concur, that the requirement to run "scrubbed" tires for the official practice sessions (as defined in Article 24.5 of the Sporting Regulations) will be modified for the New Jersey Motorsports Park event. The F4 and JFC drivers may use one (1) new set of dry weather tires for today's official Practice 1 session, and that set of tires does not need to be declared or scanned. The F4 and JFC drivers may only use scrubbed dry weather tires for today's official Practice 2 session. Any F4 or JFC car that uses two (2) new sets of dry weather tires for today's official practice sessions will be referred to the Stewards for a violation of this memo.

The Stewards note that this memo only applies to F4 and JFC and has no effect on the tire rules for Formula Regional.
